Example Charger Cart with Cable Wrap Poles and Charger Cart Legs Installed

Our Company

Since 2004, Averest, Inc. has specialized in providing battery and charger solutions specifically designed for the airline ground support equipment industry. Averest has become the frontrunner in providing these solutions by utilizing our vast aviation industry knowledge. Averest partners with leading manufacturers of industrial batteries and chargers who have the ability to produce products that meet our customer's specific requirements.

Focusing solely on the aviation industry, Averest is able to expertly recommend customized electric power solutions for every situation. Averest is on the forefront of new charging and battery technologies such as lithium batteries and high efficiency rapid charging systems.

Averest, Inc. is leading the way towards a cleaner environment by offering technically sound electric power solutions which replace internal combustion engines in airline ground support equipment.
